Subject: Testimony in support of HB 4584

We were told "Mentally Impaired, Wheelchair bound, and low quality of life." Doctors don't have a clue! My daughter Zoe just walked UNAIDED to get her diploma at 17 and is headed to Ferris for Forensic Science in the fall. She has the most severe form of Spina Bifida and it has been hard at times but she brings light into this world that few do. 5 surgeries and therapy have made her condition quite manageable. She will have a career, husband, and children.

To think of all the unnecessary abortions breaks my heart in two. 💔
